PROJECTS

Urbanyrics | <https://github.com/obygirl81/project1> | <https://obygirl81.github.io/project1/>

This is a music application that allows users to obtain lyrics of any artist they search for and users can highlight any word on the lyrics to get the definition of that word.

- I completed the front end piece. Wireframe and coding to make the application functional.
- Tools / languages used: HTML, CSS, JavaScript, JQuery, Bootstrap, Musixmatch API and Urban dictionary API.

CustomizableResidenceUpkeepDatabase|project2|<https://github.com/whitingba/Project-two><https://crud-masters.herokuapp.com/>

This is a full-stack application that allows users to manage everyday home tasks from anywhere and on any device. Users can create tasks, assign tasks to users, modify tasks, modify users, delete users, view all tasks, view all users, and view or modify future tasks.

- I completed the back- end piece. Coding the JavaScript, api routes, and models to make the application functional.
- Tools / languages used: HTML, CSS(w/bootstrap framework), JavaScript, JQuery, Express.js, MySQL2, Sequelize, Particle.js, and Heroku.
